

WATER SOLUTIONS YOU CAN TR

Since 1933, Pentair Everpure has been a leading foodservice industry supplier and trusted

WATER AFFECTS YOUR PROFITS

The first and last impressions of your business that a client typically has are the drinks that you serve. If the taste and odor of the water, ice, fountain and coffee are not as they should be, customers will notice and this is not a good way to impress them and make them return.

Water carries a large amount of chemicals, sediment and dissolved minerals that can affect the function and service life of all types of water-using foodservice equipment. Corrosion, the formation of scale and energy waste can be reduced or eliminated with proper water treatment.

WATER AFFECTS CUSTOMER SATISFACTION

Think about the following:

- Fountain beverages are 83% water
- Coffee is 99% water
- Ice is 100% water

Did you know that hard water scale formed on your foodservice equipment can reduce energy efficiency consumption by 50% or more?

We are **WATER YOU CAN TRUST**®. Whether you need filtration, softening or reverse osmosis, we are likely to have a solution. After all, our mere existence revolves around providing water of premium, uniform quality for all water-using foodservice applications. That is why so many operators rely on us to solve their water-related problems. In fact, Pentair has been the leading global provider of water quality for the foodservice industry for more than 85 years.

Pentair Everpure solutions offer:

Uniformity. Everpure products reduce minerals, unwanted chemicals and particles so that your water is clean, always.

Security. It is proven that Everpure products are effective. That is why you can find our products in foodservice operations throughout the world.

Satisfaction. Everpure water is superior in all aspects, which helps you achieve a more cost-effective, high-performance operation and a better overall experience for your customers.

COFFEE/ESPRESSO/TEA APPLICATIONS

Everpure® filters by Pentair® reduce:

- Abrasion and clogging
- Scale buildup and corrosion
- Off-tastes and odors
- Harmful cysts by mechanical means*

The benefits of Everpure filtration:

- Consistent quality, better tasting coffee, tea and espresso
- Less equipment downtime and lower energy costs
- Lower maintenance and equipment costs, and lower total cost of ownership
- Satisfied customers and increased profits

EV9275 60 QL2 OCS SYSTEM

Coffee Brewers

- Up to 3.lbs. [1.4 kgs.] of coffee per day
- Up to 17 glass pots (1/2 gal) or 13 airpots [2.5 L] brewed per day

M

*See individual system specification sheets for performance claims and FIFRA registration information.

** System capacity may be reduced in areas where higher levels of particulates exist in the water, decreasing the flow rate through the filter system over time. Replace cartridge if flow rate is reduced below the rate demanded by the equipment.
