

SYSTEM DESCRIPTION

Leveraging proprietary technology, the **EZ-RO 200/2G** system uses Reverse Osmosis (RO) to reduce Total Dissolved Solids (TDS); it provides up to 200 gal/day (757 L/day)* and includes a two-gallon (7.6 L) hydropneumatic tank. Ideal for applications where RO is necessary to meet manufacturer's warranty requirements†.

APPLICATIONS

Combi ovens

Steamers

Proofers

Non-electric design operates on available water pressure†

Sealed hydropneumatic storage tank provides capacity and pressurized water to downstream equipment

Compact design allows installation under counters and in tight spaces

Pressure gauge allows monitoring of RO

line to equipment

Installation kit comes complete with all necessary components for installation

Provides up to two times more water than standard RO membranes†

Numerous patents pending on technology and other aspects of the product design

INSTALLATION TIPS

Feed water connection to system—should be COLD only. Tempered water up to 80°F (26.6°C) can be used.
