

SYSTEM DESCRIPTION

EZ-RO 200/5G-BL

Reverse osmosis system with 200 GPD capacity and 5 GPD flow rate. The system is designed for residential use and provides clean, safe drinking water. It features a 3-stage filtration process, including a pre-filter, a reverse osmosis membrane, and a post-filter. The system is easy to install and maintain, and it does not require electricity to operate.

APPLICATIONS

" | ° | |

FEATURES • BENEFITS

Reduces lead, chlorine, and other contaminants. Improves taste and odor. Provides clean, safe drinking water. Easy to install and maintain. Does not require electricity to operate.

Reduces calcium and magnesium. Improves water quality. Provides clean, safe drinking water.

Reduces sodium and other minerals. Improves water quality. Provides clean, safe drinking water.

Reduces iron and manganese. Improves water quality. Provides clean, safe drinking water.

Reduces copper and other metals. Improves water quality. Provides clean, safe drinking water.

Reduces nitrate and other nitrates. Improves water quality. Provides clean, safe drinking water.

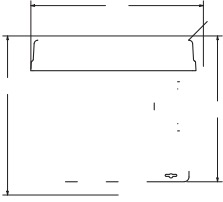

Reduces fluoride and other fluoride. Improves water quality. Provides clean, safe drinking water.

Reduces chlorine and other chlorine. Improves water quality. Provides clean, safe drinking water.

Reduces lead and other lead. Improves water quality. Provides clean, safe drinking water.

Reduces mercury and other mercury. Improves water quality. Provides clean, safe drinking water.

Reduces arsenic and other arsenic. Improves water quality. Provides clean, safe drinking water.
