

SYSTEM DESCRIPTION

Leveraging proprietary technology, the system uses Reverse Osmosis (RO) to reduce Total Dissolved Solids (TDS); it provides up to 650 gal/day

remineralization allow you to control TDS for optimal espresso, coffee and tea*.

APPLICATIONS

Espresso

Coffee

Tea / iced tea

Ice

FEATURES • BENEFITS

Meets espresso, coffee, and tea equipment and customer water quality

scale and corrosion problems due to high TDS, water hardness*, and chlorides[†]

Precision stainless steel blend valve and built-in TDS meter allow customized TDS

for espresso, coffee and tea*

7CM cartridge provides calcium and magnesium for improved extraction

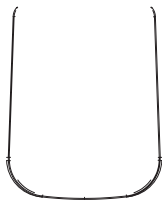

provides compact capacity and electronic pump delivers optimized water to downstream equipment

Pressure gauge allows monitoring of RO

decrease product life. Also can reduce sediment and chlorine to help protect the RO membrane*

line to equipment

cartridge replacement
