PENTAIR

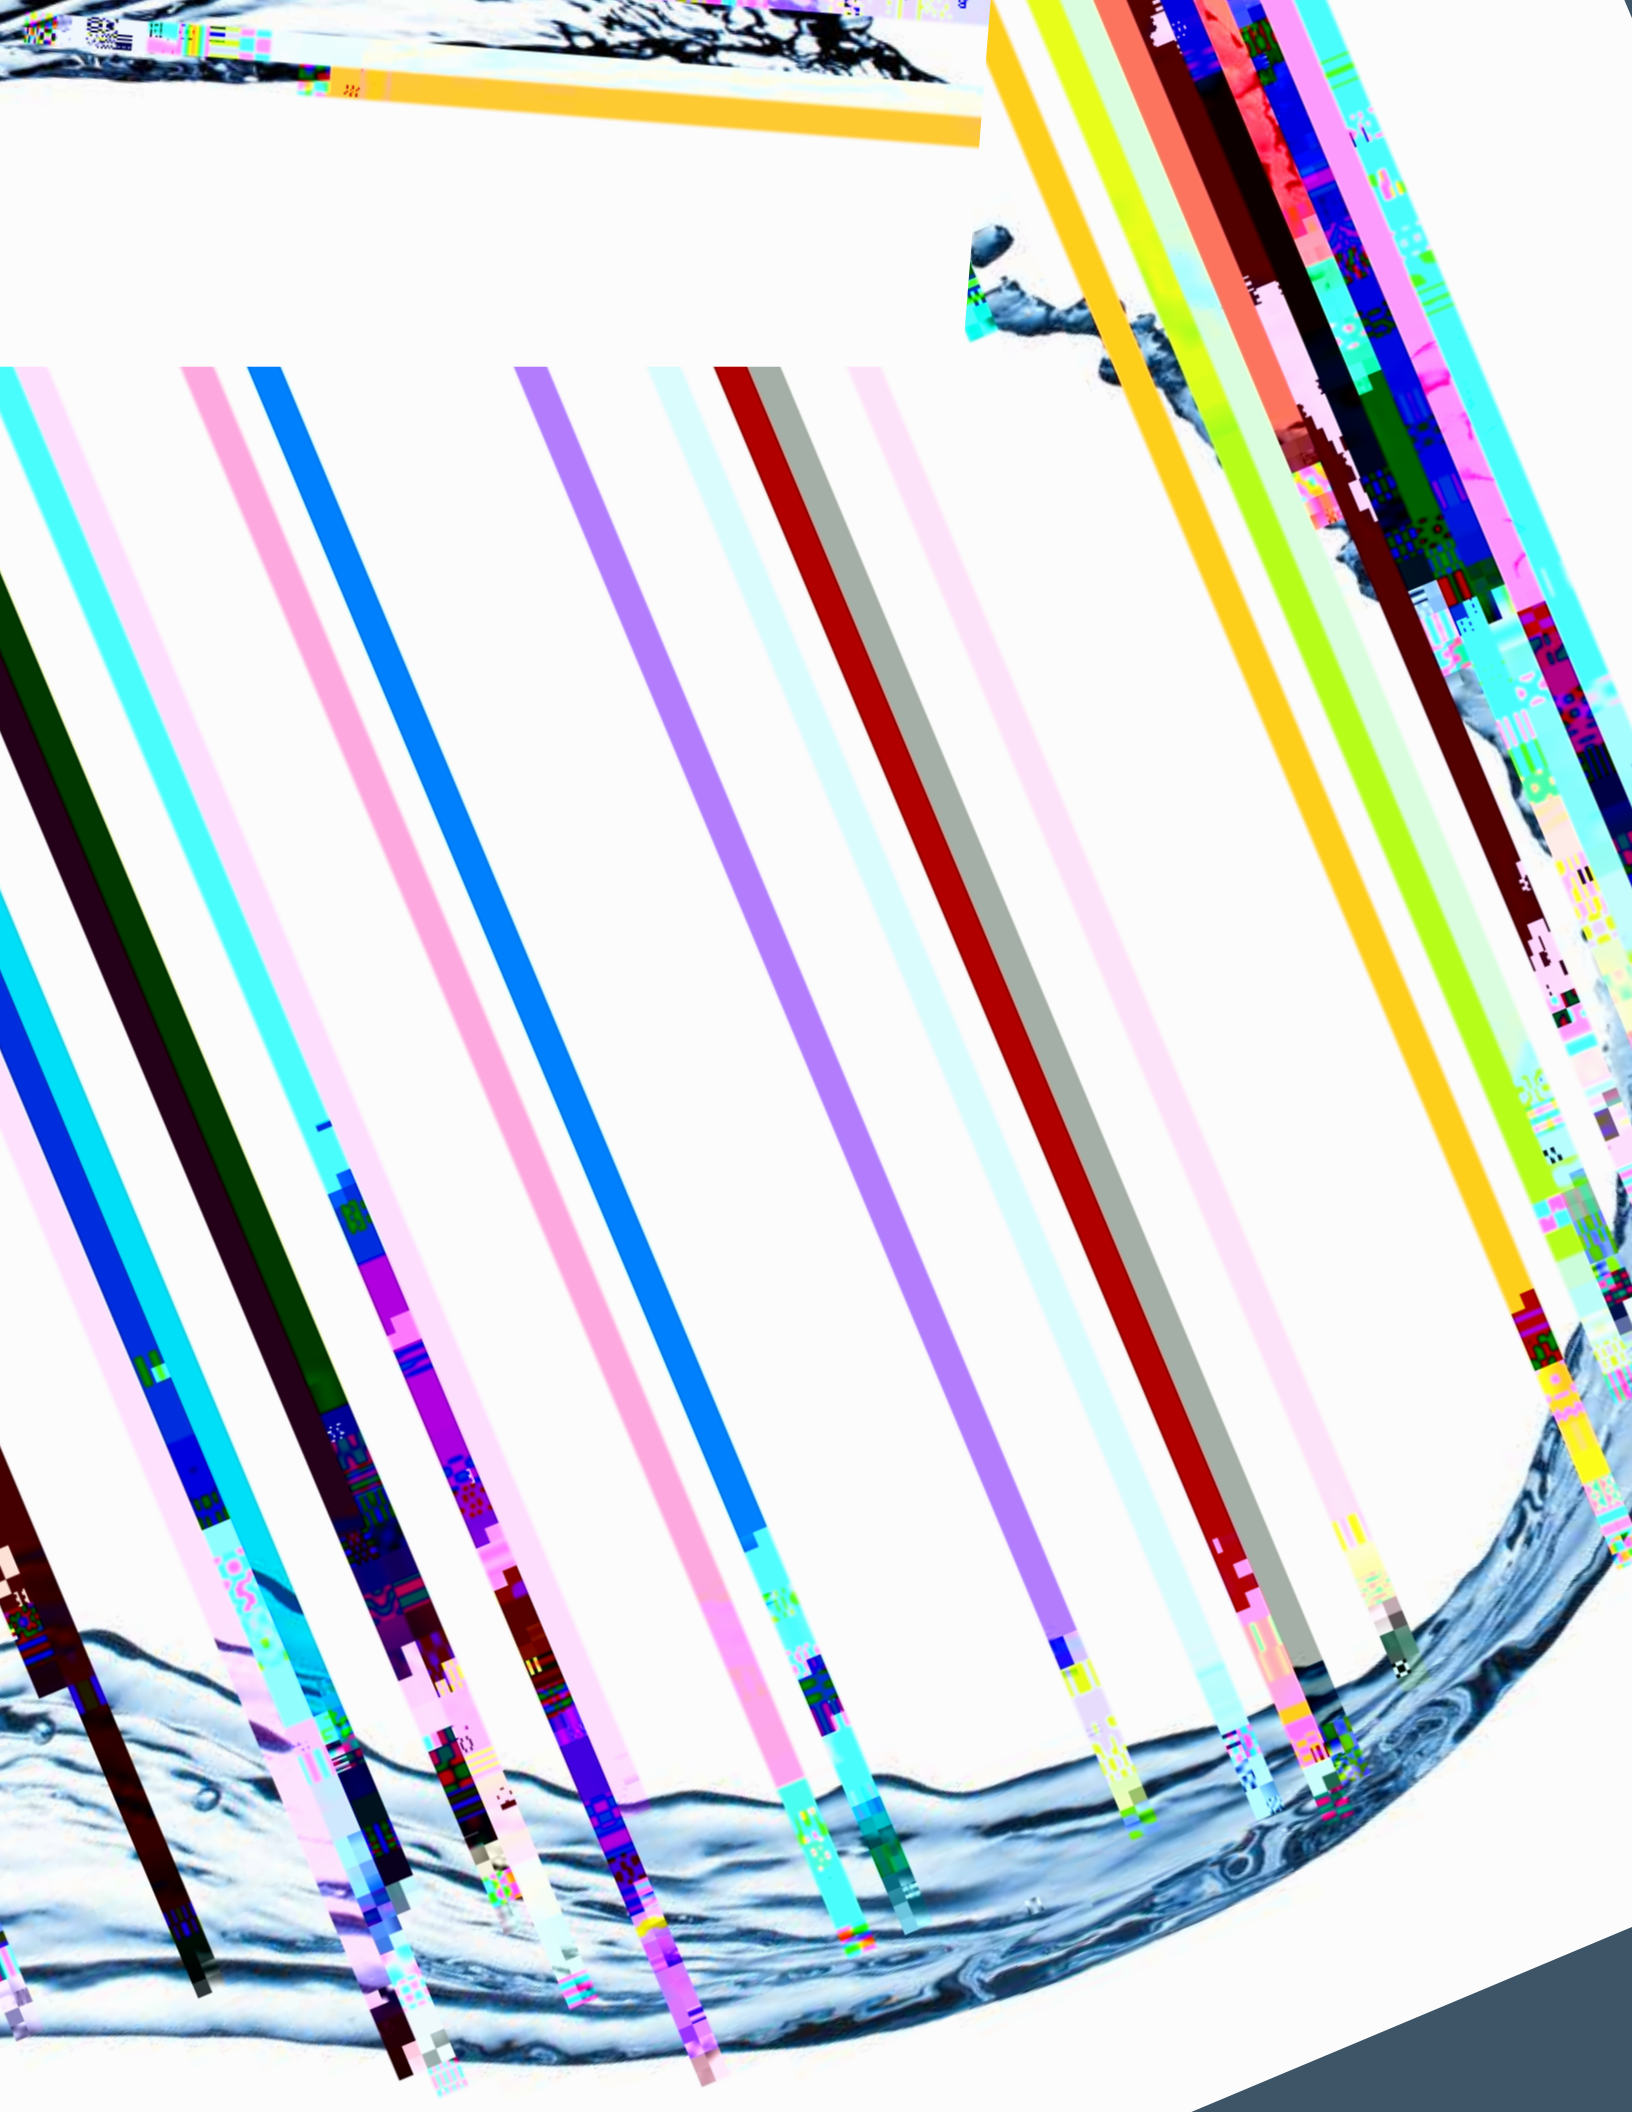
INTELLIFLO® VSF

INTELLIFLO®VSF

VARIABLE SPEED AND FLOW PUMP

Consistent flow control for the highest energy savings
and ultimate system performance.

PENTAIR.COM



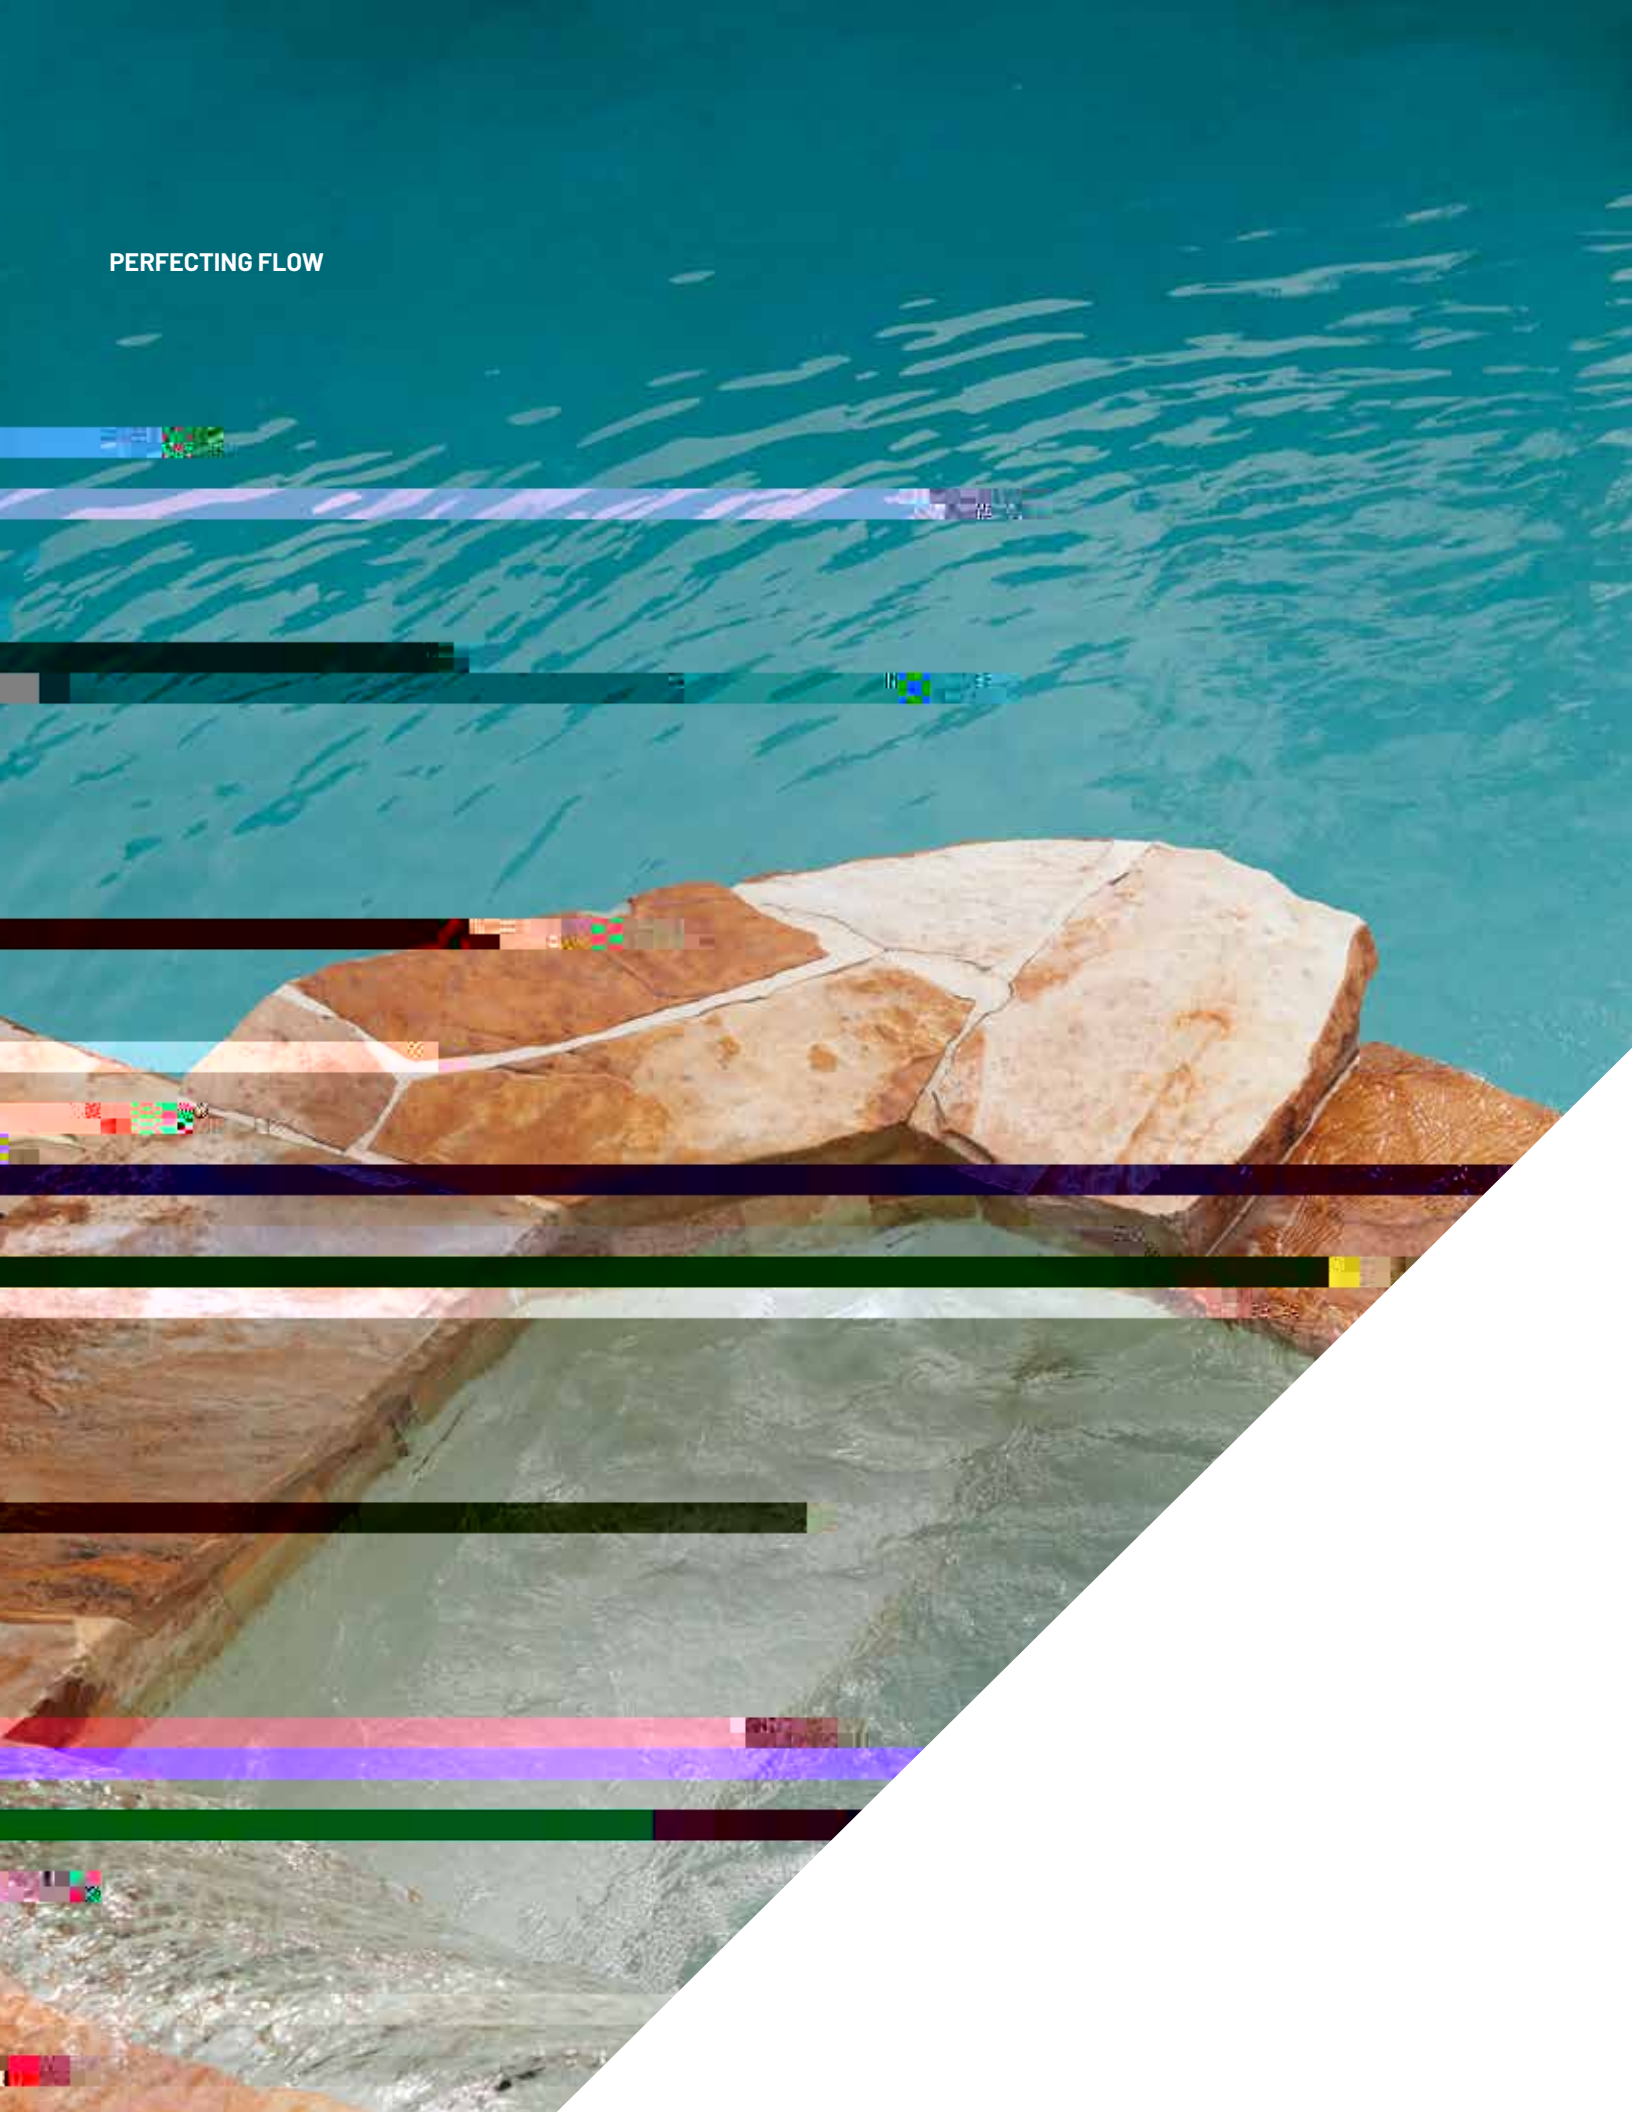
ADJUSTS TO YOUR POOL'S UNIQUE NEEDS

Every pool design is different, and conditions change, such as when filters accumulate debris. The IntelliFlo VSF Pump adjusts flow throughout the cycle to compensate for flow reduction later as debris accumulates in the filter.

ENERGY SAVINGS WITH FLOW CONTROL

Traditional variable speed pumps are set to run faster than needed early in the filtration cycle to compensate for flow reduction later as debris accumulates in the filter. The IntelliFlo VSF Pump adjusts flow throughout the cycle to minimize energy use.

SPEED



Pentair is the first brand to offer speed control and flow control in the same pump. And, the IntelliFlo VSF Pump is the most recent product in a long history of firsts. Innovations include: the first variable speed pool pump, the first variable flow pool pump, Safety Vacuum Release System (SVRS) technology and the first ENERGY STAR® Certified pool pump.

Smart technology for remarkable energy efficiency

One of the quietest pumps on the planet

When operating at low speed, know it's operating.
